

Hurricane Season: **June 1- November 30**

ARE YOU PREPARED?

Protect your Florida Lottery Inventory and Terminal Equipment from Hurricane, Windstorm, Tornado or Water Damage.

- 1** Make sure your Lottery inventory is accounted for daily and all documentation is in a safe and secure place.
- 2** Protect your Lottery inventory in a proper security safe. Remember, in-the-floor safes may not protect against water damage.
- 3** In the event you do not have a safe, you can purchase a fire proof and water resistant storage cabinet from your local office supply store.
- 4** Cover your Lottery terminal equipment with heavy-duty, waterproof plastic and seal with heavy-duty duct tape.
- 5** Use water resistant, plastic containers or bags for additional storage.
- 6** Always store Lottery inventory above flood level and away from an area where water damage from the roof could occur.
- 7** Store any outside curb signs inside to prevent them from becoming flying missiles in high winds.
- 8** Protect windows and doors with hurricane shutters or $\frac{3}{4}$ " plywood panels secured with screws placed no more than 18" apart.

If you have any questions, comments or ideas, please contact the Florida Lottery at 1-800-226-3344 Option 4.
